4	Median Maths = 40	<b>M1</b>	Indication of finding medians, such as mark on graph or reference marks to 700 pupils, condone poor terminology such as ‘mean’
	Median English = 55	<b>A1</b>	Both values correct, condone 54<English<56 but 54, 56 get A0
	Median of English is larger than median of Maths	<b>B1</b>	Correct statement, median must be referenced within answer. No credit if statement references ‘means’
	Range Maths is 100 or IQ range Maths = $80 - 12 = 68$	<b>M1</b>	Evidence of finding either both ranges or both IQ ranges i.e. see a minus
	Range English is 60 or IQ range English = $62 - 42 = 20$	<b>A1</b>	Both ranges or IQR correct
	Maths marks have more spread than English marks	<b>B1</b>	Correct conclusion. Accept standard deviation but must see some figures
