(b)	Given that $E(X) = 0.25$ , find the value of $Var(X)$ .	

(a)	Find the probability that in any randomly chosen 7-day period, more than 2 days have more than 10 cm of rain.
(b)	For 3 randomly chosen 7-day periods, find the probability that exactly two of these periods ha
(b)	For 3 randomly chosen 7-day periods, find the probability that exactly two of these periods ha at least one day with more than 10 cm of rain.
<b>(b)</b>	
(b)	at least one day with more than 10 cm of rain.
(b)	at least one day with more than 10 cm of rain.
(b)	at least one day with more than 10 cm of rain.
(b)	at least one day with more than 10 cm of rain.
<b>(b)</b>	at least one day with more than 10 cm of rain.
(b)	at least one day with more than 10 cm of rain.
(b)	at least one day with more than 10 cm of rain.

3 At a summer camp an arithmetic test is taken by 250 children. The times taken, to the nearest minute, to complete the test were recorded. The results are summarised in the table.

Time taken, in minutes	1 – 30	31 – 45	46 – 65	66 – 75	76 – 100
Frequency	21	30	68	86	45

(a) Draw a histogram to represent this information.

[4]

<b>(b)</b>	State which class interval contains the median.	[1]
		••••
(c)	Given that an estimate of the mean time is 61.05 minutes, state what feature of the distribut accounts for the median and the mean being different.	ion
	accounts for the median and the mean being different.	[1]
	1 = 1125	

	Find the probability that a randomly chosen male leopard from this region weighs and 62 kg.	between 46 [4
