**6.**                                                        **Figure 1**

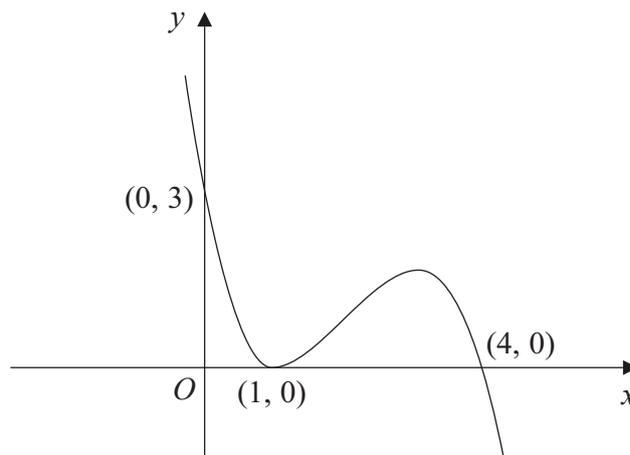

Figure 1 shows a sketch of the curve with equation $y = f(x)$.  The curve passes through the points (0, 3) and (4, 0) and touches the $x$-axis at the point (1, 0).

On separate diagrams sketch the curve with equation

(a)  $y = f(x + 1)$,

**(3)**

(b)  $y = 2 f(x)$,

**(3)**

(c)  $y = f\left(\dfrac{1}{2}x\right)$.

**(3)**

On each diagram show clearly the coordinates of all the points where the curve meets the axes.
