4.

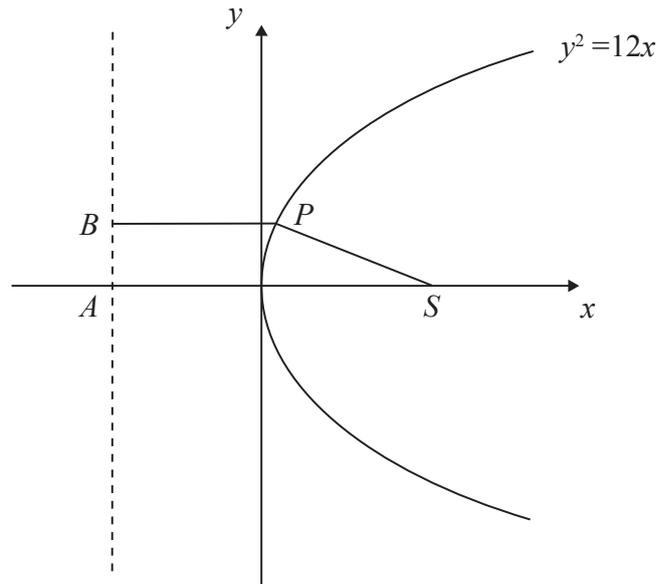

**Figure 1**

Figure 1 shows a sketch of part of the parabola with equation $y^2 = 12x$.

The point P on the parabola has x -coordinate $\frac{1}{3}$.

The point S is the focus of the parabola.

(a) Write down the coordinates of S .

(1)

The points A and B lie on the directrix of the parabola.

The point A is on the x -axis and the y -coordinate of B is positive.

Given that $ABPS$ is a trapezium,

(b) calculate the perimeter of $ABPS$.

(5)

6.

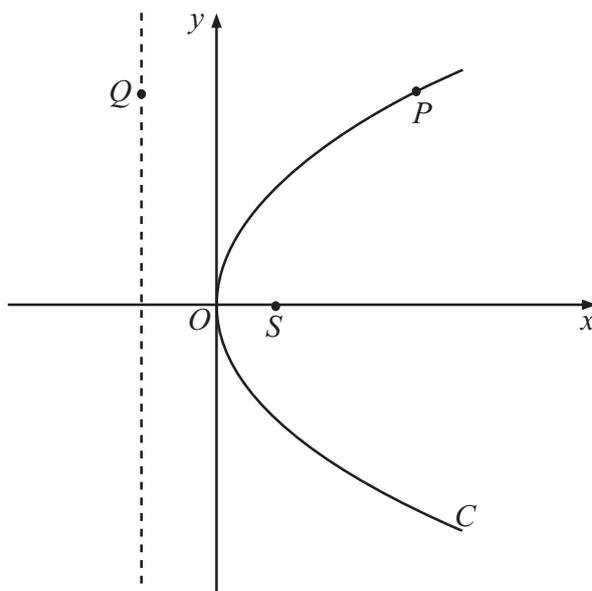

Figure 1

Figure 1 shows a sketch of the parabola C with equation $y^2 = 36x$.
The point S is the focus of C .

(a) Find the coordinates of S . (1)

(b) Write down the equation of the directrix of C . (1)

Figure 1 shows the point P which lies on C , where $y > 0$, and the point Q which lies on the directrix of C . The line segment QP is parallel to the x -axis.

Given that the distance PS is 25,

(c) write down the distance QP , (1)

(d) find the coordinates of P , (3)

(e) find the area of the trapezium $OSPQ$. (2)

5.

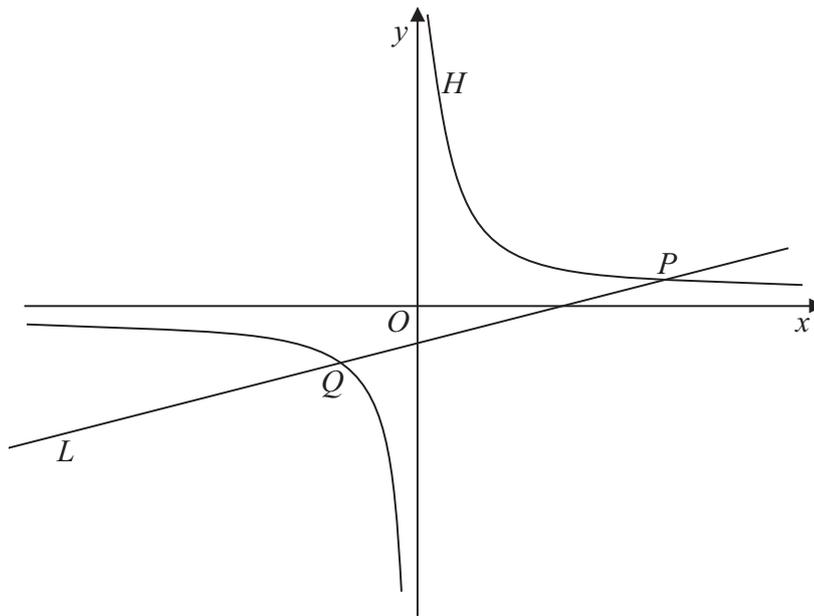

**Figure 1**

Figure 1 shows a rectangular hyperbola H with parametric equations

$$x = 3t, \quad y = \frac{3}{t}, \quad t \neq 0$$

The line L with equation $6y = 4x - 15$ intersects H at the point P and at the point Q as shown in Figure 1.

(a) Show that L intersects H where $4t^2 - 5t - 6 = 0$ (3)

(b) Hence, or otherwise, find the coordinates of points P and Q . (5)
