[5]

$$\int_{-2}^0 (3x - 1)^2 \, dx.$$

$$f(x) = x^3 + kx - 20.$$

(b) solve the equation $f(x) = 0$. [4]

Total: 6

3. (a) Given that [2]

$$5 \cos(\theta) - 2 \sin(\theta) = 0,$$

show that $\tan(\theta) = 2.5$.

(b) Solve, for $0 \leq x \leq 180$, the equation [4]

$$5 \cos(2x^\circ) - 2 \sin(2x^\circ) = 0,$$

giving your answers to 1 decimal place.

Total: 6

(a) $3^{x-2} = 5$.

[3]

[4]

(a) the common ratio of the series, [2]

(c) the sum to infinity of the series. [4]

Total: 8

6. Figure shows the curve with equation $y = (x - \log(x))^2, x > 0$.

- (a) Copy and complete the table below for points on the curve, giving the y values to 2 decimal places. [2]

x	2	3	4	5	6
y	2.89	6.36			

The shaded area is bounded by the curve, the x -axis and the lines $x = 2$ and $x = 6$.

- (b) Use the trapezium rule with all the values in your table to estimate the area of the shaded region. [4]
- (c) State, with a reason, whether your answer to part (b) is an under-estimate or an over-estimate of the true area. [2]

Total: 8

$$f(x) = 2 + 6x^2 - x^3.$$

- Find the coordinates of the stationary points of the curve $y = f(x)$. [5]
- Determine whether each stationary point is a maximum or minimum point. [3]
- Sketch the curve $y = f(x)$. [2]
- State the set of values of k for which the equation $f(x) = k$ has three solutions. [1]

8. Figure shows the circle C and the straight line l .

The centre of C lies on the x -axis and l intersects C at the points $A(2, 4)$ and $B(8, -8)$.

- (a) Find the gradient of l . [2]
- (b) Find the coordinates of the mid-point of AB . [2]
- (c) Find the coordinates of the centre of C . [5]
- (d) Show that C has the equation $x^2 + y^2 - 18x + 16 = 0$. [3]

Total: 12

9. Figure shows a design painted on the wall at a karting track.

The sign consists of triangle ABC and two circular sectors of radius 2 metres and 1 metre with centres A and B respectively.

Given that $AB = 7$ m, $AC = 3$ m and $\angle ACB = 2.2$ radians,

- use the sine rule to find the size of $\angle ABC$ in radians to 3 significant figures, [3]
- show that $\angle BAC = 0.588$ radians to 3 significant figures, [2]
- find the area of triangle ABC , [2]
- find the area of the wall covered by the design. [5]
